

DEPARTMENT OF MICROBIOLOGY
STAMFORD UNIVERSITY BANGLADESH

Stamford Journal of Microbiology
Call for Papers

The Stamford Journal of Microbiology will publish articles in all the areas of Molecular biology, Biotechnology, Genetic engineering, and different fields of Microbiology like medical, food, pharmaceutical, environmental, agricultural sciences. The Journal welcomes submission of manuscripts that meet the general criteria of significance and scientific excellence. Stamford Journal of Microbiology will be published twice a year and all articles will be peer-reviewed.

Our objective is to inform authors of the decision on their manuscript(s) within four weeks of submission. Following acceptance, a paper will normally be published in the next issue.

Invitation to Review

SJM is looking for qualified reviewers as members of its review board team. SJM will serve as a great resource for researchers and students across the globe. We ask you to support this initiative by joining our Reviewer's team. If you are interested to serve as a reviewer, please send us your resume to editorsjom@yahoo.com

Stamford Journal of Microbiology: ISSN 2074-5346

INSTRUCTIONS TO AUTHORS

General Policy

Submission of a paper to the Stamford Journal of Microbiology implies:

- that it reports unpublished and original work not under consideration for publication elsewhere;
- the transfer of the copyright from the author to the Publisher. Include a statement in the cover letter accompanying the manuscript, signed by all authors, that the authors have consent for publication of the article, and that the contents have not been published elsewhere, or the paper is not being submitted elsewhere. The authors are responsible for the accuracy of data and all matters contained in the papers including accuracy of references. The editors or the management of the Journal will not be responsible for any opinion or contents of the papers.

Reviewer

All contributions are studied by reviewers whose names are not normally disclosed to authors. On acceptance for publication of papers are subjected to editorial amendment.

Types of Papers

Original Articles: These should be a record of original research and should not normally exceed 6000 words in length.

Short Communications: These should not exceed 1500 words or equivalent space including figures and tables. These must be brief definitive reports and not preliminary findings.

Review articles: The Editor normally invites these but unsolicited review articles of up to 6000 words are welcome.

Letters to the Editor: These will be included at the discretion of the Editors.

Manuscript

In order to expedite publication, a copy of the manuscript should be submitted electronically via e-mail attachment. In addition, three copies of the entire manuscript including table and figures, and an electronic version of the same in e-mail or CD must be submitted. The manuscript should be typed on A4 paper with double spacing and wide margins, on one side of the paper only, and should be accompanied by a separate title page giving the authors' names and affiliation, as well as address for correspondence. Author should write in clear and concise English.

Arrangement of Manuscript

Paper must be arranged in the following order of presentation:

- *Title of Paper:* It should be short, specific and informative.
- *Names of the Authors:* Authors' name, affiliation, full postal address, and telephone, fax number and e-mail address (if any) should be clearly indicated.
- *Abstract:* A self-contained synopsis of the paper (100-200 words in length); outlining a single paragraph the aims, scope and conclusions of the paper.
- *Keywords:* Two to five keywords for indexing.
- *The Text:* Suitably divide under headings such as Introduction, Materials and Methods, Results, and Discussions (applicable only in cases of the original articles).
- *Acknowledgements:* If necessary.
- *References:* Should be typed according to the style of the Stamford Journal of Microbiology.

- *Corresponding author:* Article should contain full address of communication of the corresponding author including e-mail, fax and telephone numbers (if any).

Submission not conforming to these guidelines may be returned to the authors.

Introduction

The introduction should open with a terse statement of the subject, orient the report in the field and explain the purpose in that context, without an extensive review of the literature.

Materials and Methods

Authors should mention the nomenclature, the source of materials and equipment used with manufacturer's details in parentheses. The procedures adopted should be explicitly stated to enable other workers to reproduce the results. The author may describe new method in sufficient detail indicating their limitations. Established methods can just be mentioned with authentic reference and significant deviations.

Results

Only such data that are essential for understanding the discussion and main conclusions emerging from the study should be included. Data presented in Tables and Figures should not be repeated in the text. The same data should not be presented in both tabular and graphic forms.

Discussion

The discussion should deal with the interpretation of results without repeating what already was presented under the results. Discussion should relate new findings to the known one if any and include logical deductions. The results should be interpreted and not recapitulated. Excessive speculation should be avoided.

The last paragraph of this section should contain a concise conclusion. The conclusions should be linked with the aims and objective of the study but unqualified statements and conclusions not completely supported by the data should be avoided.

References

Number all references to the literature in a single sequence in order in which they appear in the text, using Arabic numerals as superscripts. If the author cites a reference more than once in the text, it should be cited as same number. When multiple consecutive references are cited at a given place in the text, use a hyphen to join the first and the last numbers that are inclusive (e.g., 1-5, 8-12). Use commas (without spaces) to separate non-inclusive numbers in a multiple citation (e.g., 8, 10, 12, 14-18).

Literature references must consist of names and initials of all authors, year, title of paper referred to, abbreviated title of periodical, volume number, and first and last page numbers of the paper. Abbreviate journals titles in accordance with *Bibliographic Guide for Editors and Authors* (American Chemical Society). (1) Journal Articles, (2) Books (Monograph), (3) Multi-Author Books (Chapter in a Book), (4) Conference Papers or Proceedings, (5) Magazine or Newspaper Articles, and (6) Internet Articles should accord with:

1. **Bouzide, A., Sauve, G. & Yelle, J. (2005).** Lysine derivatives as potent HIV protease inhibitors. Discovery, synthesis and structure-activity relationship studies. *Bioorg Med Chem Lett.* 15(5): 1509-1513.
2. **Roitt, I. M. & Delves, P. J. (2001).** *Roitt's Essential Immunology*, 10th ed, pp 164-176. Blackwell Science Ltd, Oxford.
